SUBJECT: Education Futures Grant Awards

The California Community Colleges Chancellor’s Office, Workforce and Economic Development Division is proud to announce Education Futures awards for teacher preparation programs, anticipated to total \$3.52 million over two years, pending first year performance.

The Chancellor’s Office appreciates the effort all applicants devoted to the planning and development of quality applications. The application process mapped local partnerships, identified local resources, and built upon a commitment to regional and cross-system collaboration to meet the statewide teacher shortage.

We received 44 applications and 23 colleges were funded: nine Regional Model Grants, six Development Grants, and eight Incubator Grants. Grant applications were reviewed and competitively scored. Regions with clear support for the development of teacher preparation programs were prioritized, and funds were awarded within those regions based on reviewer scores and applicant grant levels (Regional Model and Lead, Regional Model, Development, and Incubator).

This one-time funding supports regional efforts to scale up teacher preparation programs in order to maximize our impact on expanding and diversifying the teacher workforce. Where regional Strong Workforce leadership prioritized this work, and where teacher preparation leadership and local capacity are strongest, these funds incentivize the use of local resources to expand services while encouraging teacher preparation integration into the core operations of the college. Regional teacher preparation program communities of practice developed through this initiative will align Community College education pathways with key partners from K12, CSUs, and other Institutions of Higher Education. The Education Futures program supports regional efforts to align systems, develop infrastructure, and disseminate resources needed for colleges to grow their own teacher preparation programs.

Guiding students from across all pathways toward teaching professions is fundamental to our mission as educators, and of crucial importance to the education system in California. California’s students will benefit tremendously as we expand clear education pathways across systems and diversify student populations entering teaching professions.
