

CTE Data Unlocked Technical Assistance for Strong Workforce Program Local Share Planning

Colleges that fulfilled CTE Data Unlocked training requirements are eligible for technical assistance. While most colleges identified a topic for the ten hours of support in their template for funding and technical assistance, colleges can elect to devote their support to data analysis and goal setting for the local share of Strong Workforce Program funds instead. This document outlines the process that CTE Data Unlocked Experts will use to support college planning. Each college will be contacted during the week of August 29 to determine the desired content for technical assistance, ensure that eligibility requirements have been completed, and to connect colleges with their assigned Expert.

Initial Planning Meeting

The Expert will meet with college leaders to walk through:

- The local share template process
- Required metrics and projections process
- Available resources to support the local process, including how to access support for labor market data through the Centers of Excellence, Deputy Sector Navigators, and Sector Navigators

Student Data Review and Benchmarking Meeting

Based on the programs that the college intends to target with Strong Workforce Program funding, the Expert will meet with college leaders to:

- Review student outcomes that are required as part of the local share template
- Support the college in evaluating available student and program data
- Walk through benchmarking tools
- Demonstrate other tools that can support local planning
- Describe a state-approved process for adjusting course and program codes
- Assist in establishing action steps to prepare for completing the college template, data clean up, and links to the regional planning process

Planning Meeting for \$50,000 Data Usage Grants

If the college has determined that it needs to redirect its \$50,000 for data usage, the Expert will support the college to:

- Determine top priorities for funding and desired goals
- Assess what would be needed to attain the goals, both internally and externally
- Evaluate whether any of this work could be conducted regionally or with a statewide sector effort
- Create an initial list of action steps
